Front End Developer

Web Designer | M.Sc. Management of Natural Resources

SUMMARY

After running through a full-time training in the basic requirements for being a Webdesigner I started working for my former employer and we established an excellent collaboration.

Quickly, I noticed that I wanted to dive deeper into the matter to really absorb the fundamentals of the web - coding.

Recently, I accomplished a half year full-time coding Bootcamp and I am excited and full of anticipation to support as a Front End Developer in the best way I can.

EXPERIENCE

Intensive full-time Code & Design Bootcamp to become a Front End Developer

Devhaus Leipzig
